A Marriage of Necessity

Carriers

Vendors

Fax Relay

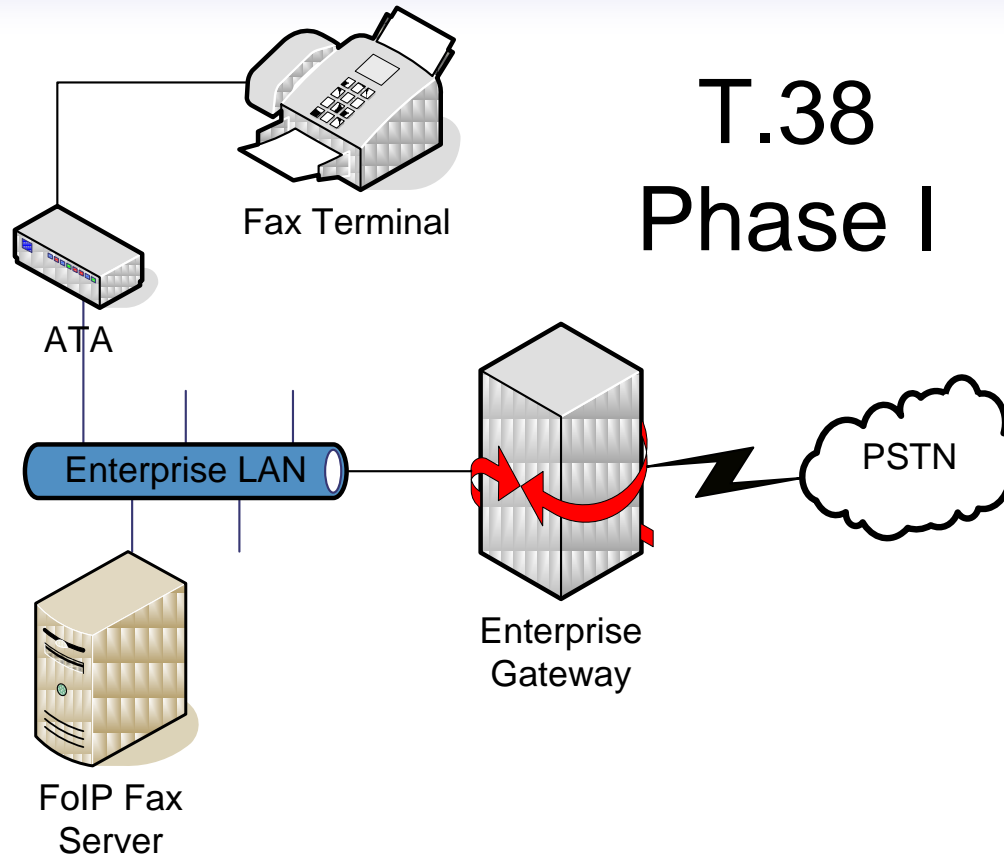

T.38 Deployment Phases:

- Phase I: 1998-2008
- Phase II: 2007-2018

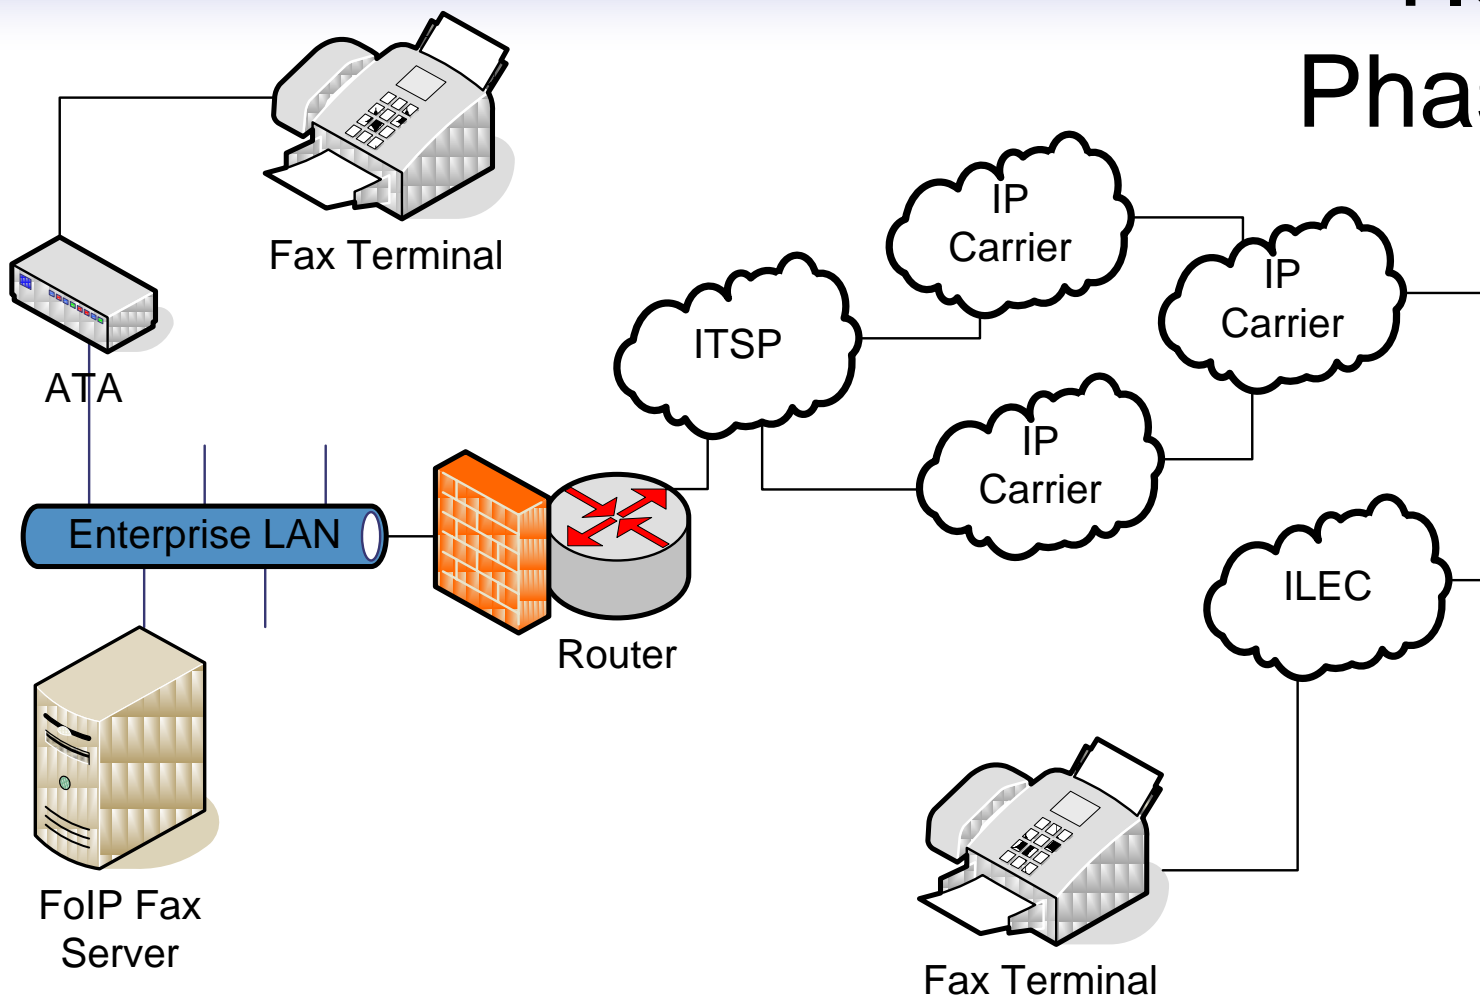

Intra-Enterprise

And Now...Bring on The Carriers!

T.38
Phase II

Voice Is Easy!

- Voice is generally the default
- Agree on a codec
- Enable the media stream
- Take care of jitter-buffer management
- Get rid of echo
- You're done!
- Call set-up timing not critical.

But in Fax...

Timing is everything.

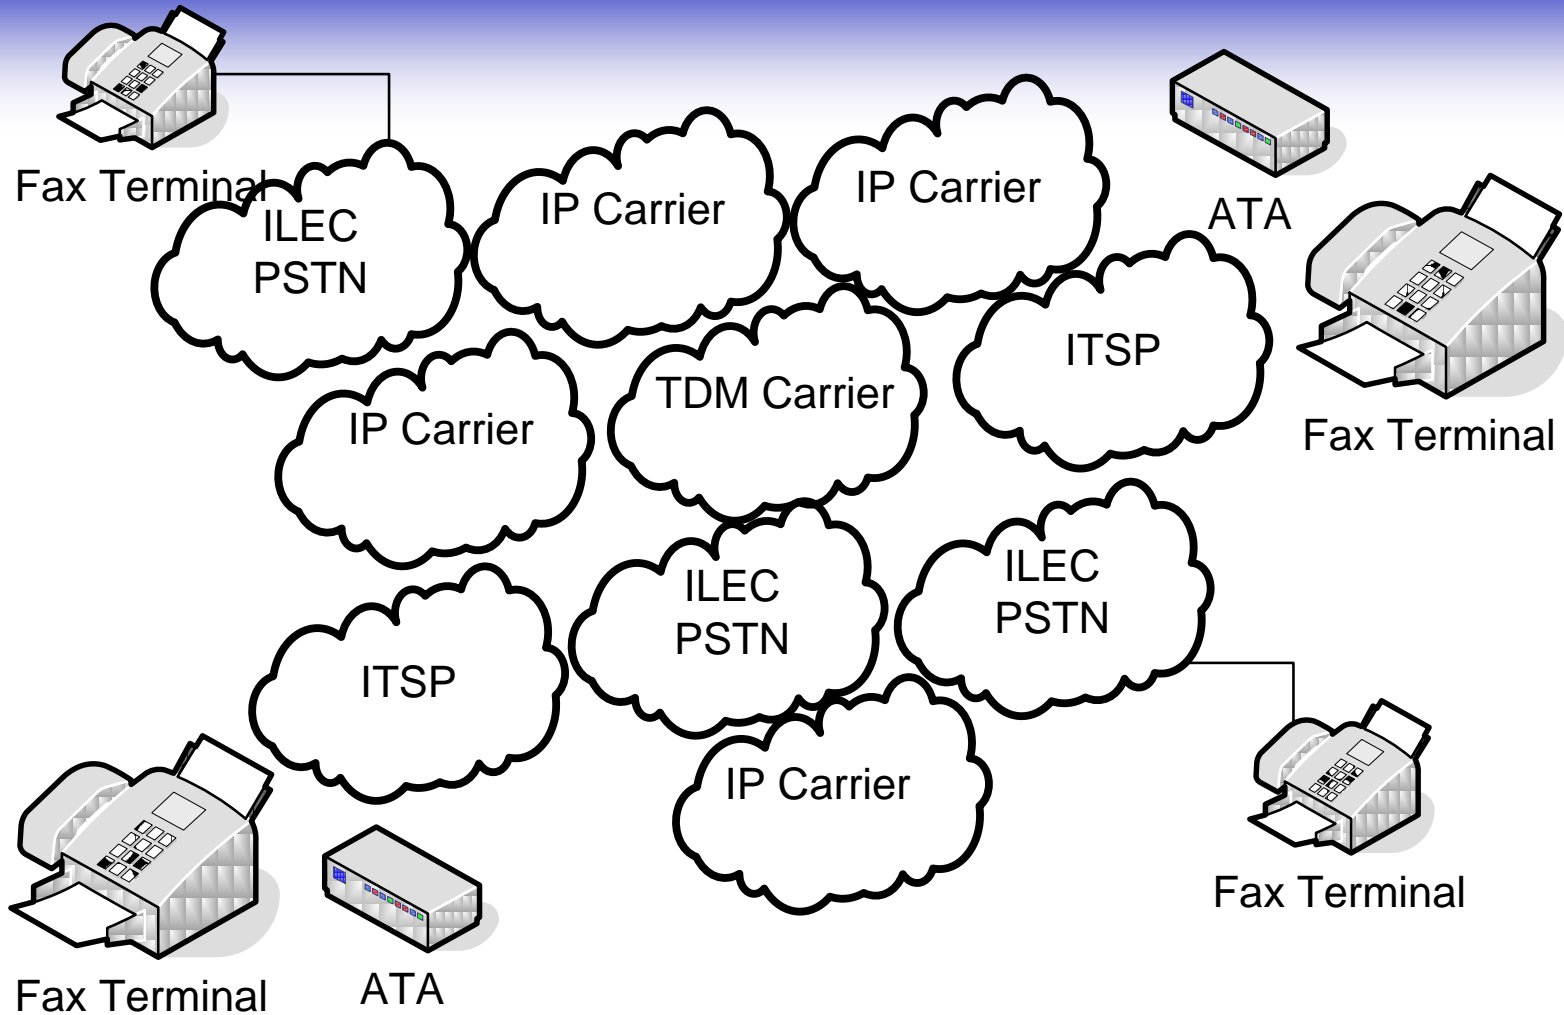

FoIP...It's About Time

- Computer-to-computer protocol (T.30)
- Synchronous modems
- Media stream, which begins in G.711, must be renegotiated and switched to T.38
- **Timing** is everything!

Separating the Issues

Carrier-Based Fax

So...What about testing?

- Many networks are untested for FoIP.
- Many firewalls and other network elements are not correctly configured.
- Excessive signaling delay remains undiagnosed

Plan Your FoLP Trip

A Dahlonega, GA

B Roswell, GA

[Add Destination - Show options](#)

[Get Directions](#)

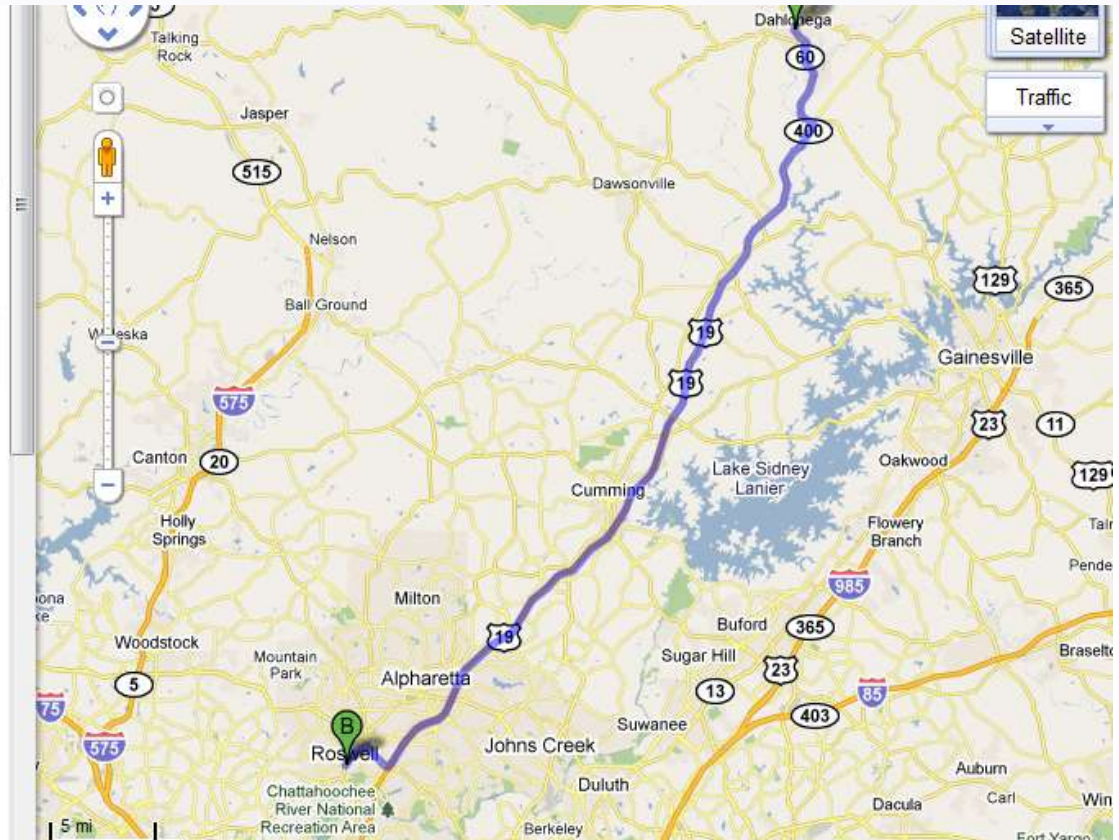

Driving directions to Roswell, GA

Suggested routes

- | | | |
|-----------------------|---------|----------------|
| 1. GA-400 S/US-19 S | 47.2 mi | 55 mins |
| 2. GA-9 S and US-19 S | 52.8 mi | 1 hour 12 mins |

A Dahlonega, GA

1. Head **southwest** on **Public Square N** toward **S Chestatee St**
148 ft
2. Turn **left** at **S Chestatee St**
5.5 mi
3. Turn **right** at **GA-400 S/US-19 S**
38.5 mi
4. Take **exit 7** for **GA-140 W** toward **Roswell**
0.2 mi
5. Turn **right** at **GA-140 W/Holcomb Bridge**

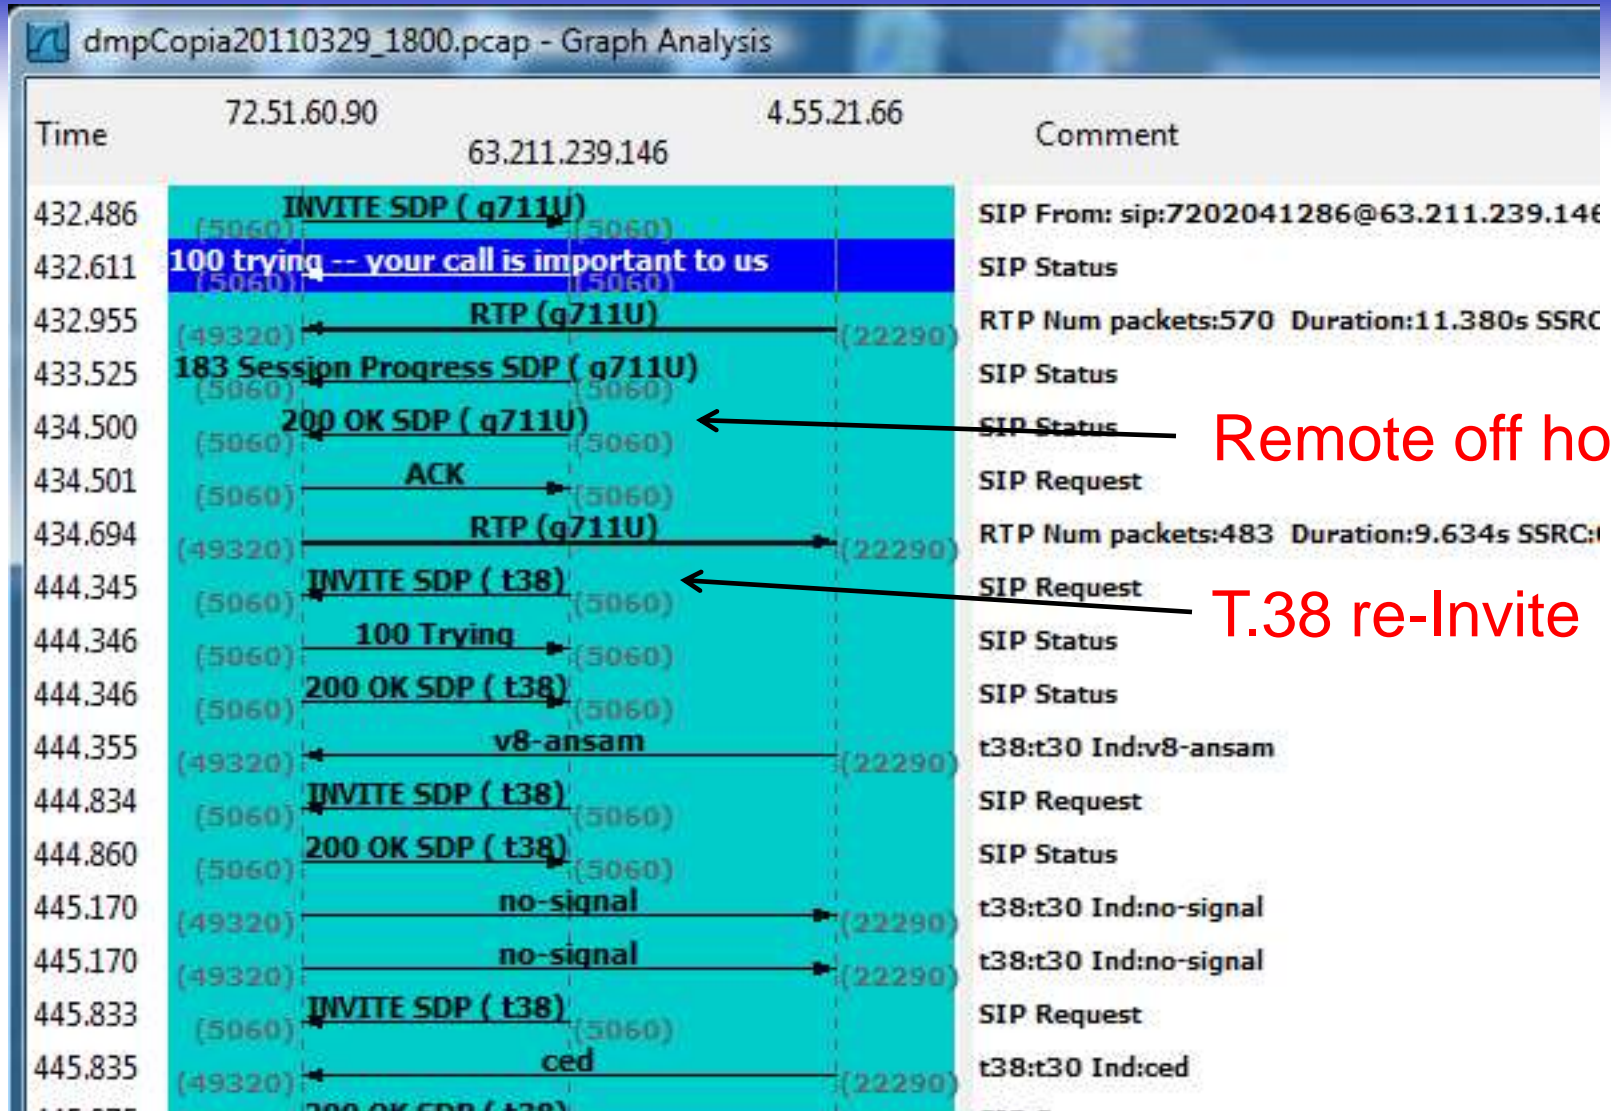

Some Results:

In a Recent Broadcast Test
200 out of 2000 calls
had late-arriving T.38 re-Invites
leading to fax failures.

Outbound to ITSP

Remote off hook

T.38 re-Invite

G.711 Audio

Caller

Point of no return

DIS

Callee

T.38 re-Invite here. Bye-bye fax.

Can our industry respond
effectively to these problems?

- Deutsche Telekom
- iBasis
- SFT
- OTEGLOBE
- TATA
- Telkom SA
- WIS
- Telekom Italia
- Sparkle
- Telecom Poland
- Telefonica
- Reach
- FSB
- Telenor

SIP Forum FoIP Task Group Goal:

Develop and publish the guidelines (recommended practices) that will reduce the implementation problems that are today hindering IP-based fax deployments in carrier-based applications.

Problems Solved & To Be Solved

- T.38 needed to be clearer about some parms. (see T.38 10/2010, D.2.3.5)
- V.34-SIP integration is complex
(see T.38 10/2010, D.2.2.5)
- Tandem connections do not appear to have been adequately tested. (on-going)

But...

Reliable IP-based real-time fax can only be achieved with effective cooperation between vendors (SIP Forum) and carriers (i3 Forum).

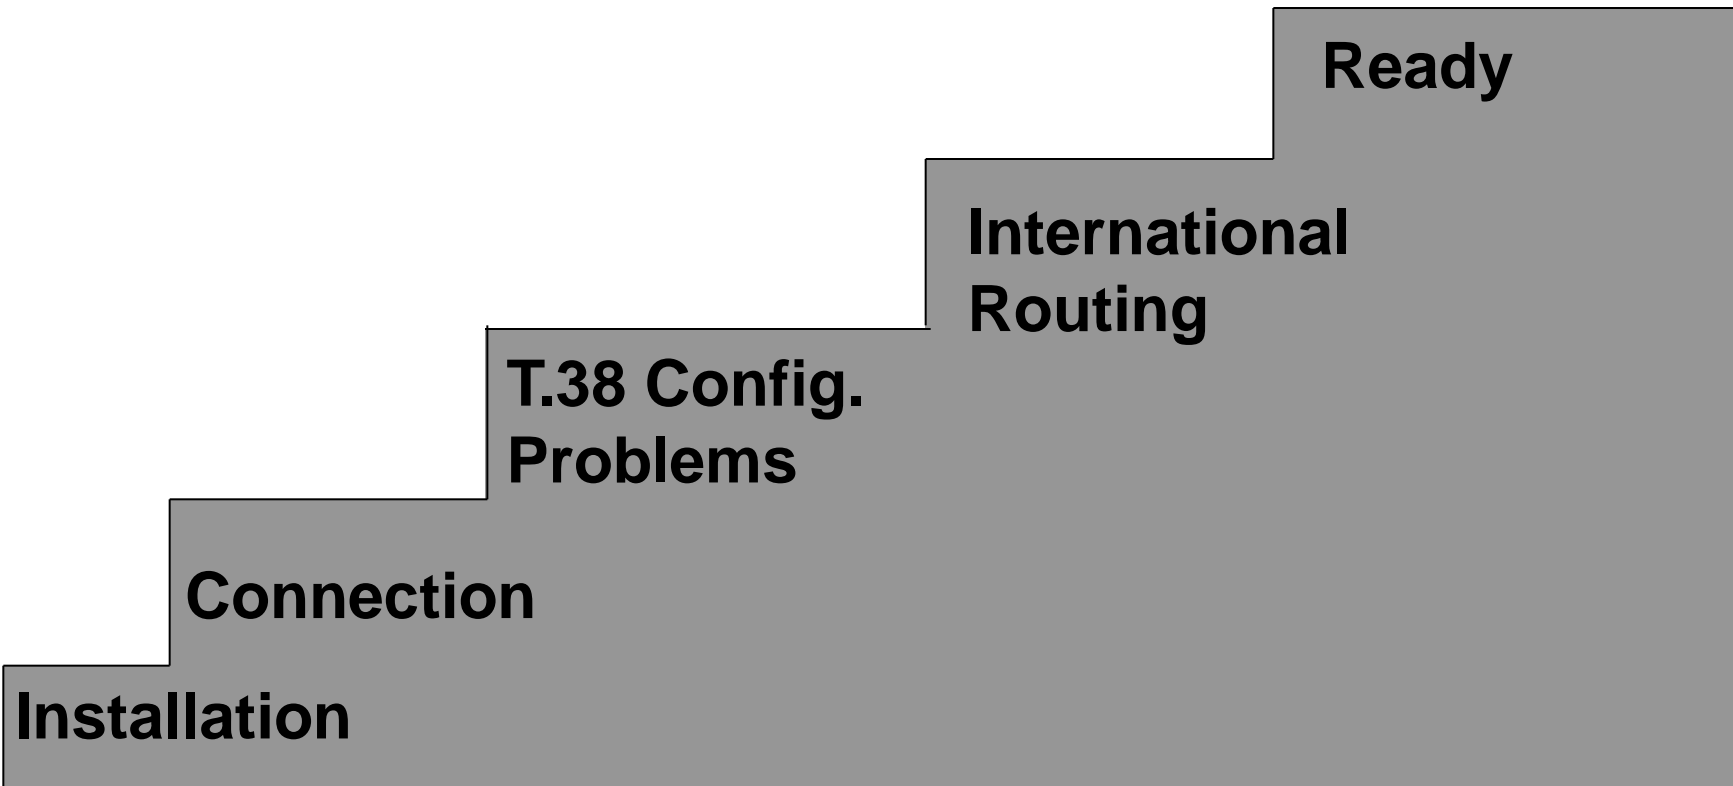

What the Industry Needs

SIP **F**ORUM

Test Plan

Schedule:

- Installation: Oct.-Feb.
- Testing: 1H2011
- Collection/analysis: Q2
- Recommendations: Q3
- Follow-up testing: Q4
- Final report: Q4/1Q12
